

Employer Strategic Assessment

Assisting employers with assessing their strategies and implementing ACHRM's NINE Healthcare Cost Containment Strategies

NINE Healthcare Cost Containment Solutions ● Demonstrated Savings

ACHRM's strategic assessment tool assists employers who are struggling to manage healthcare costs and actively searching for innovative solutions. The tool assesses your healthcare cost containment and health risk management strategies and leverages ACHRM's NINE Healthcare Cost Containment Strategies (HCCs) generated within ACHRM's community. Our strategic assessment was generated as a result of employers who approached ACHRM to create pathways to save dollars and cut healthcare costs rather than relying on decisions to cut salaries, personnel, increase taxes, etc.

Healthcare Cost Containment Strategy Phases:

Employers will find value through the following pathways:

1. **Questionnaire + Consultation + Executive Summary - Maintain Status Quo**
Assess current strategies, receive recommendations, but you're not ready to pursue current recommendations.
2. **Questionnaire + Consultation + Executive Summary Do-It-Yourself (DIY) basis**
Assess your current strategies and offer recommendations to engage Menu of Solutions on a DIY basis
3. **Questionnaire + Consultation + Executive Summary + Implementation Support**
Implement solutions engaging ACHRM's Implementation team. ACHRM will provide a turn-key solution consisting of a best-in-class integrated team of solution providers to enable ACHRM's NINE Healthcare Cost Containment Strategies.

Contact ACHRM to start the process today with your organization.
